

## Take Control of Fire Safety Like Never Before

### Integrated Fire System Management – Powered by Nittan

Get complete visibility and control of your fire detection systems from a single, intelligent software platform.

Whether you're managing one building or multiple sites, our solution centralises alarm data, improves response times, and simplifies compliance – all within an intuitive user interface.

### Key Features:

#### Unified Alarm Monitoring

Consolidate multiple fire alarm panels and detection zones into one centralised view.

#### Real-Time System Visualisation

View live alarm states and device statuses across interactive site maps and dashboards.

#### Full Audit Trails & Reports

Generate time-stamped reports for compliance, reviews, and system performance audits.

#### Scalable & Configurable

Adaptable to sites of all sizes – from individual buildings to multi-site estates.

#### Supports Leading Fire Alarm Systems

Flexible integration with third-party fire panels using open and bespoke protocols.

#### Ideal For:

- ★ Critical infrastructure
- ★ Healthcare & education
- ★ Industrial facilities
- ★ Data centres
- ★ Government & defence

#### Why Choose the Nittan Fire Integration Platform:

- ✔ Faster, smarter fire response
- ✔ Reduce risk and operational downtime
- ✔ Improve visibility for teams and responders
- ✔ Lower long-term maintenance and service costs
- ✔ Stay audit-ready with built-in reporting tools
